

I heard on TV/radio and read in the paper that cell phone numbers might be provided to telemarketers. I HOPE NOT! On my cell phone plan I have to pay for in-coming calls as well as the for the calls I make. I don't like being bothered by telemarketers and I emphatically do not want to have to pay for calls they make to me! If they do have the cell phone numbers, I want to be able to block those calls with the no-call list.
